KAMILANE PLLA Protection Platform Technology

A unique material protection platform created using our proprietary patented technology

KAMILANE PLLA - C

Selective capture of desired active materials

KAMILANE PLLA - P

Stable protection from external environments

KAMILANE PLLA - R

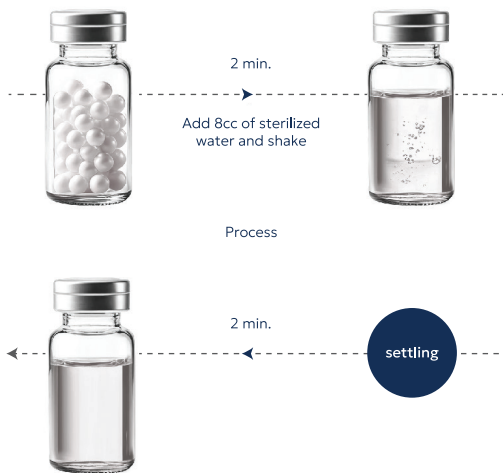

Controlled release of protected active materials

During production and distribution periods, active substances can be protected and released in a controlled manner

Instant Dissolve Technology

Rapid dissolved by LTQ technology and multi porous material

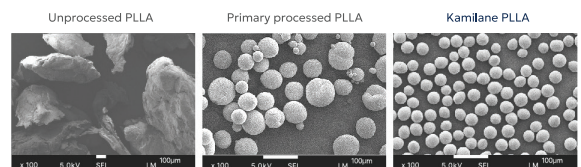

KAMILANE PLLA Clinical Results (B&A)

KAMILANE PLLA Manufacturing Technology

Particle Size and Shape Comparison

It has a regular particle shape minimizing nodules and granuloma as well as a uniform particle size from 30 to 80 µm preventing inflammatory response.

KAMILANE PLLA 301/Glu Technology

Protecting Vitamin-C and Glutathione
Ensuring sustained effects when used
